Environment:	Windows 10 Postman Git Bash / psql Urban Scooter v1.0		

Description

According to the requirements, after deleting a courier who has accepted an order, the order data should be erased from the Orders table in the database, however the data remains in the table

Preconditions: App is running, connected via ssh and accessed psql database

Steps:

1. Create a courier using POST

1. url/api/v1/courier POST { "login": "test", "password": "1234", "firstName": "josh" }

2. Create an order using POST
1. url/api/v1/orders POST { "firstName": "Naruto", "lastName": "Uchiha", "address": "Konoha, 142 apt.", "metroStation": 4, "phone": "+7 800 355 35 35", "rentTime": 5, "deliveryDate": "2024-11-18", /**USE CURRENT DATE*/ "comment": "Saske, come back to Konoha", "color": ["BLACK"] }
3. Accept the order using PUT
1. PUT url/api/v1/orders/accept/1?courierId=1
4. Verify order info using GET
1. GET url/api/v1/orders?courierId=1 url/api/v1/courier/1
5. Delete courier using DELETE
1. DELETE url/api/v1/courier/1 { "id": "1" }
6. Verify data has not been erased in database using terminal
1. terminal: SELECT * FROM "Orders"

[JKS9-13] On the Customer Info form, Subway Station field has duplicate stations listed
